

WATER CYCLE IN A BAG!

Watch how water moves in a never-ending cycle—
just like it does in nature!

1 Gather your supplies!

- Ziploc bag
- Water
- Blue food coloring (or blue marker)
- Tape
- Sunny window!

2 Decorate your bag!

Draw a sun and clouds on the outside of the bag.

3 Add a little water!

Pour a little water into the bag. Add a drop of blue food coloring and swirl it around.

4 Seal it up!

Close the bag almost all the way. Leave a tiny opening at the top.

5 Tape it to a sunny window!

Use tape to hang your bag on a sunny window. The sun's heat will start the water cycle!

6 Watch the water cycle happen!

Over a few days, you'll see: water evaporate, clouds form at the top, and rain fall back down!
